

REMARKS

In the above-identified Office Action, the Examiner has indicated that the heading for the section: BRIEF SUMMARY OF THE INVENTION was missing from the specification. By the above amendment, Applicant has added this to the specification and as such, believes the specification now to be acceptable.

The Examiner has objected to the claims because of certain noted informalities. These matters have been corrected through the above amendments, and as corrected, Applicant believes the claims to be acceptable.

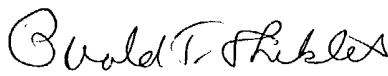

In addition, claims 9, 11-14, 21 and 22 have been rejected under 35 U.S.C. § 112 as indefinite for certain matters regarding the antecedent basis. Applicant has changed dependencies and changed recitals of elements and as such believes the claims now provide proper antecedent basis for each limitation in the claims.

Claims 1, 4-6, 8, 17 and 22 have been rejected as anticipated by the patent to Kim. Claims 2, 3, 7, 10, 15, 16 and 18-20 have been objected to as dependent on a rejected based claim but allowable if rewritten in independent form. Applicant has combined claims 1 and 2 and as claim 2 was previously indicated as allowable, believes that newly amended claim 1 also is now allowable. In addition, Applicant has added new claim 23 which is a combination of claims 1 and 3 and as such believes that new claim 23 is allowable.

Applicant hereby requests reconsideration and reexamination thereof.

With the above amendments and remarks, this application is considered ready for allowance and Applicant earnestly solicits an early notice of same. Should the Examiner be of the opinion that a telephone conference would expedite prosecution of the subject application, he is respectfully requested to call the undersigned at the below-listed number.

Respectfully submitted,
